million people

Atlas System

A digital community funding platform built on Web3, smart contracts and community participation.

Participants open Smart Cycles, track their progress and request available support under the current rules.

Smart Cycle 2 is the current cycle in the Atlas ecosystem.

atlas-system.global

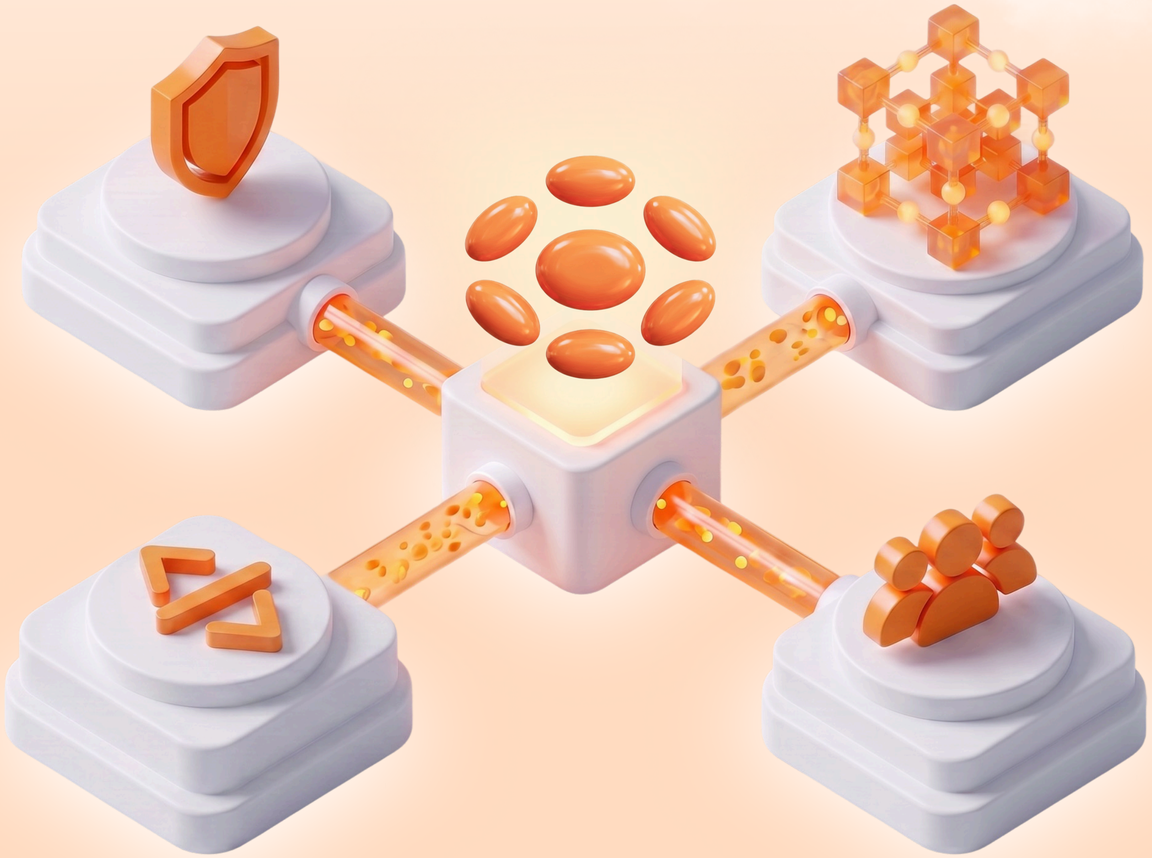
Architecture and governance

Smart contracts

SC2 records cycle terms, calculates amounts due and applies the published rules on BNB Smart Chain.

Your dashboard

Manage your cycles, track activity and access participant services.



Administrative powers

Defined administrative powers govern entry limits, plan availability and opening times.

Community governance

Vote through Atlas Governance under the published rules for each proposal.

Atlas combines on-chain contracts, off-chain services and defined operational responsibilities.

Atlas System products

The ecosystem develops in stages. Each product has its own role and availability status.

Smart Cycle 2

Live

Fixed-term Lockup Flow cycles and Daily Flow Core, governed by the published SC2 rules.

Invite & Earn

Live

The SC2 Partner Program uses qualification levels and Partner Rewards based on rate differences.

Knowledge Hub

Available

Official guides, terminology and learning materials.

Academy

Planned · Q1 2027

A planned learning platform for Atlas participants and teams.

P2P Exchange

Planned · Q4 2026

A planned service for participants to exchange digital assets directly.

Crypto Wallet

Planned · Q2 2027

A planned wallet within the Atlas ecosystem.

Atlas System products

ATLAS
Perfomance partners program

Traffic RevShare

In development

A program for traffic partners. The public page is live; the partner dashboard is in development.

ATLAS
talk messenger

Talk Messenger

Planned · Q1 2027

A planned messaging service for the Atlas community.

ATLAS
governance

Governance

Live

A live community voting service with published rules for submitting proposals and voting.

ATLAS
swap DAO

Swap DAO

Planned · Q2 2027

A planned service for exchanging digital assets within the ecosystem.

ATLAS
bank DAO

Bank DAO

Planned · Q2 2028

A planned ecosystem development concept. It does not imply authorization to provide banking services.

Smart Cycle 2 — Lockup Flow

Calculated Delta for the full cycle

Contract Test

Imperium

50 days

+45%

Marshal

60 days

+60%

Standard plans start at 10 USDT. Contract Test requires exactly 10 USDT, once per address. Opening a cycle depends on current availability and entry limits. Payments depend on contract conditions and available liquidity.

Smart Cycle 2 — Daily Flow

Core

200 days

for each completed 24-hour period.

1.2%

Calculated total: 240%, including the original support amount.

Calculated Delta: +140% over the full cycle.

Opening a cycle depends on current availability and entry limits. Payments depend on contract conditions and available liquidity.

Transparency you can verify

Published contract code

Explore the SC2 code, contract details and technical documentation.

Blockchain records

Check cycle transactions and confirmed transfers on BscScan.

Defined powers

See which parameters are fixed and which entry settings can change.

Liquidity information

Distinguish SC2 assets and its liquidity position from the public pool's total liquidity.

Audit scope

SC1 audit reports cover SC1. An independent SC2 audit report has yet to be published.

How Smart Cycle 2 works

1. Open a cycle

Choose an available plan and provide your support amount within the current limits.

2. Allocation on entry

6% goes to the platform and 2% to the SC1 compensation fund. Cycle calculations use the full original support amount.

3. Liquidity accounting

SC2 uses its recorded liquid assets and shared PancakeSwap V3 liquidity position under the contract's rules.

4. Request support

Select “Request support” once the cycle conditions are met. Payment requires available assets and successful execution of the transaction.

A payment formula does not prove that trading or the liquidity position generates enough income to fund those payments.

One ecosystem. A succession of Smart Cycles

Smart Cycle 1: the previous phase

Its active phase has ended. Documents, transactions and results remain in the archive.

Smart Cycle 2: the current cycle

Updated cycle terms, liquidity mechanics and Partner Program rules.

Future cycles, future decisions

The community sets the terms of each new cycle through DAO voting.

A new cycle does not automatically carry over previous balances or guarantee recovery of past losses.

Risk disclosure

Voluntary participation

Read the rules and risks before providing support. Participation does not guarantee recovery of your support amount or receipt of Delta.

Shared liquidity

Payments depend on available recorded assets and, if needed, a successful withdrawal from the liquidity position. The calculated amount may not be available for payment when the cycle ends.

Technology dependencies

Smart contracts, tokens, the blockchain, wallets and liquidity infrastructure carry operational and security risks.

Entry conditions may change

New cycles depend on plan availability, entry limits and opening times. You may not be able to start another cycle immediately.

Before participating, read the current Smart Cycle Rules and Risk Disclosure.

Smart Cycle 2 Partner Program

22 partner ranks. Qualification-based rewards. Distribution based on rate differences.

Partner rank	Start	Builder 1	Builder 2	Builder 3	Builder 4	Builder 5	Builder 6	Master 1	Master 2	Master 3	Master 4
Personal qualifying volume, USDT	10	50	100	200	300	500	700	1,000	1,500	2,000	2,500
First-level qualifying volume, USDT	—	100	300	700	1,200	2,000	3,000	4,500	7,000	10,000	13,000
Team qualifying volume, USDT	—	—	1,000	2,000	4,000	7,000	12,000	18,000	28,000	40,000	60,000
Partner Reward rate, % of Delta	10	12	14	16	18	20	22	24.5	27	29.5	32
Matching Reward rate, %	—	—	—	—	—	—	—	1	3	5	7

All qualification thresholds must be met at the same time. Rewards use the positive difference between rates, applied to Delta. Matching Reward is available from Master 1 and is calculated from the Partner Rewards of your direct referrals, subject to the rank requirement. Rates do not guarantee payments.

Smart Cycle 2 Partner Program

22 partner ranks. Qualification-based rewards. Distribution based on rate differences.

Partner rank	Master 5	Master 6	Architect 1	Architect 2	Architect 3	Architect 4	Architect 5	Architect 6	Top Leader 1	Top Leader 2	Top Leader 3
Personal qualifying volume, USDT	3,000	4,000	5,000	6,000	7,000	8,000	10,000	12,000	15,000	20,000	30,000
First-level qualifying volume, USDT	17,000	25,000	35,000	45,000	60,000	80,000	100,000	120,000	150,000	200,000	300,000
Team qualifying volume, USDT	85,000	120,000	200,000	300,000	450,000	600,000	800,000	1,100,000	1,500,000	2,000,000	3,000,000
Partner Reward rate, % of Delta	34.5	37	40	43	46	49	52	55	60	65	70
Matching Reward rate, %	9	11	14	17	20	23	26	29	33	37	41

All qualification thresholds must be met at the same time. Rewards use the positive difference between rates, applied to Delta. Matching Reward is available from Master 1 and is calculated from the Partner Rewards of your direct referrals, subject to the rank requirement. Rates do not guarantee payments.

A year of consecutive Smart Cycles

Illustrative scenario starting with 1,000 USDT

Premiere · 30 days · +21% calculated Delta per cycle

Completed cycle	Day	Calculated amount, USDT
1	30	1,210.00
2	60	1,464.10
3	90	1,771.56
4	120	2,143.59
5	150	2,593.74
6	180	3,138.43
7	210	3,797.50
8	240	4,594.97
9	270	5,559.92
10	300	6,727.50
11	330	8,140.27
12	360	9,849.73

9,849.73 USDT: calculated final amount

12 cycles · 360 days, excluding any waiting time

Assumes full payments, each manually used in the next cycle without delay. Each new cycle must fit the entry limits, and Premiere must be available. Waiting extends the timeline. Network fees are excluded. This is an illustrative calculation, not a guaranteed outcome.

Getting started

1. **Open the official dashboard**

   Follow the link from atlas-system.global and choose an available sign-in method.

2. **Read the rules and prepare your funds**

   Check the network, funding instructions and fees for your chosen wallet setup.

3. **Choose an available Smart Cycle**

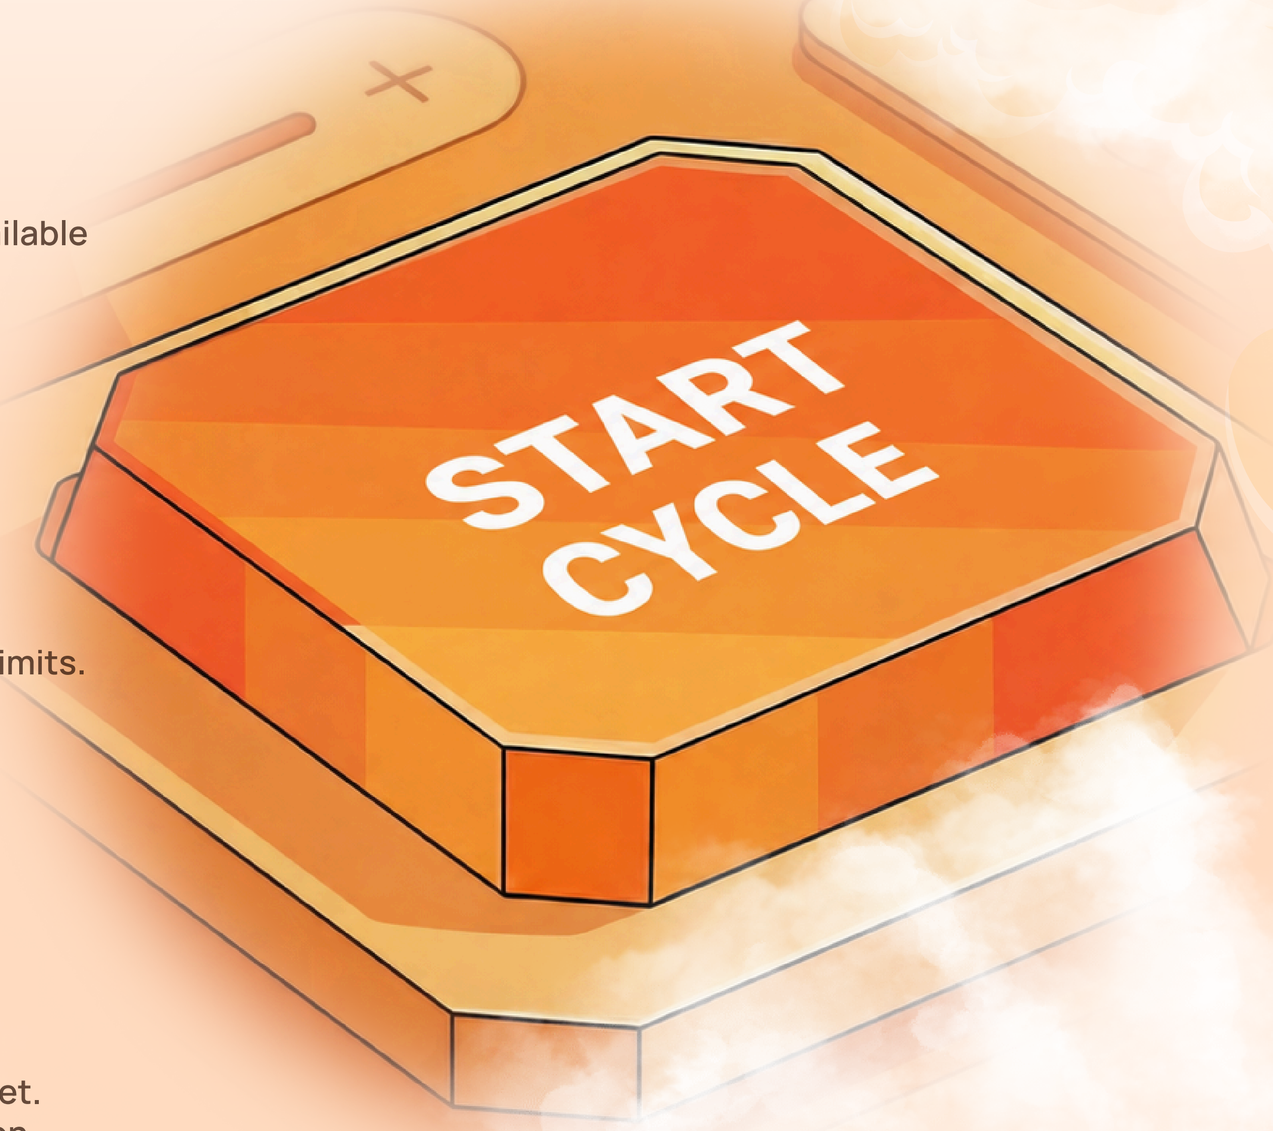
   Review the cycle term, calculated Delta and current entry limits.

4. **Confirm your cycle**

   Check your support amount and transaction details, then confirm.

5. **Track your cycle and select “Request support”**

   Request available support once the cycle conditions are met. Opening a new cycle requires a separate decision and action.



New participant guide

Fast Start: five simple steps

1. **Learn about Atlas**
   Understand the SC2 terms and rules.
2. **Explore it yourself**
   Get familiar with the dashboard and how a cycle works.
3. **Learn to explain it**
   Describe Atlas in your own words.
4. **Start a conversation**
   Share the materials with people who are interested.
5. **Help a new participant**
   Guide them through the same five steps.

Learn step by step, without the jargon.

Each step gives you a clear action.
Use the materials to build your understanding and help new participants get started.

Open Fast Start and begin with step one.
